

SHARPSHELL

Engineering | Corrosion Protection | Fire Protection

Project

REFURBISHMENT OF SLUICE LAGOONS

Client

Lepelle Northern Water/ MandlabroJV

Location

Lepelle, Limpopo

Status

Ongoing – May 2019

Service

Civil and structural engineering, mechanical engineering

Scope

Fabrication, supply and installation of canal platform structures, canal gates, sluice gates and gantry.

Short description

This project entailed the management and execution of all aspects related to the platform structures of Lepelle Northern Water's sluice lagoons. A highly technical team comprising artisans, many stemming from the local communities, completed the project scope in the quickest turnaround ever recorded for this type of scope by the Lepelle Northern Water's projects team.
