

SHARPSHELL

Engineering | Corrosion Protection | Fire Protection

Project

PAINTING INSULATION AND CLADDING

Client

Petrosa

Location

Mossel Bay

Status

Completed the 2018 shutdown. Contract still ongoing.

Service

Corrosion protection

Scope

Execution of painting, cladding and insulation scope across the entire refinery.

Short description

Short description: This project entailed the management and execution of all aspects pertaining to Petrosa's corrosion protection during the 2018 shutdown. This included painting, insulation, corrosion protection, cladding and insulation. The majority of the 250-strong team included mainly locals from around the Eden district. The project management team was very lean and management structure flat to allow for quick turnaround. Sharpshell mobilised within the shortest time recorded in its history.

Photographs are for illustrative use of the services only, and are not representations of the actual project.
